Partnerships are an essential component to making the Summit possible.

Higher Education attendees collaborate and connect with businesses, advisors, governments, foundations and nonprofits in many ways throughout the Summit. We are expecting over 300 in person / 500 virtual participants to discuss the urgent and unprecedented actions we can take to stave off the worst impacts of climate change. At our highly interactive Summit, participants are encouraged to work together to find new solutions and partnerships, launch new initiatives, and generate publicity around this work.

The 2023 Higher Education Climate Leadership Summit is the premier gathering of a select group of leaders committed to driving our nation’s climate action.

Partners of the 2023 Summit will help drive the adoption of new strategies to reduce direct climate impacts of colleges and universities and inform endowment investing strategies that accelerate a just transition to a carbon-neutral economy. As a partner, you also demonstrate your climate leadership and help support the critical movement-building efforts of Second Nature and the Intentional Endowments Network.
