

Kwan-Yin Graw

Kwan is the Associate Director of BankFWD. Prior to this, she worked for Bank of America on the Mortgage Backed Securities trading desk. There, she experienced the disconnect between the actions of the world's largest banks to address climate change and the reality of what science tells us is needed to avoid the most catastrophic effects of climate change. She aims to bridge this divide in her work with BankFWD. Kwan is a graduate of Penn State with a degree in finance and economics.
