

Liz is the Global Sustainability Director at Interface, a flooring company that has been working to eliminate its' negative impact on the environment since 1994. In her role, Liz directs the Carbon Neutral Floors program, which ensures that all flooring sold by Interface does not have a carbon impact. She advises on the setting of ambitious goals and strategies to reach those goals, including Interface's recently announced Science Based Targets on their path to becoming a Carbon Negative Company by 2040. Additionally, she leads the GHG data collection and analysis for global operations.

Prior to her work at Interface, Liz worked for TK Elevator where she spearheaded the environmental reporting effort for TKE North America and was a major contributor to their CDP reporting efforts. She researched and analyzed energy and carbon strategy for the fleet, factory, and real estate pieces of the business and headed efforts to integrate sustainability into the culture at TKE. Liz has a PhD and master's from Georgia Tech in Environmental Engineering and a bachelor's in Polymer and Fiber Engineering. She lives with her husband and their dog, Puzzles, in Atlanta.
