

Tom Poveromo is a Fleet Procurement Specialist at UCLA Fleet and Transit Services. He has worked at the university for over 22 years and oversees a fleet of close to 1000 vehicles including street-legal low-speed vehicles (LSV's). Tom takes pride in bringing new all-electric vehicles to the UCLA fleet and successfully procured the first all-electric Winnebago for the UCLA Health Instrument Engineering team. Other accomplishments have been the addition of all-electric shuttle buses, an electric 26' box truck and hybrid police cars. UCLA has a carbon neutrality goal of 100% by 2025 and Tom will be an active participant in helping the university reach that goal.
